

Discus DMC.Producer

Dicom patient's media - burning & printing

You are looking for a DICOM CD robot that works reliable and fast?

The DISCUS Producer is the solution for creating patient CDs / DVDs and Blu-Rays. With a push of a button the patient media are created fully automatic and printed with an individual label. Studies can be send directly from the PACS or the modalities. The media contain the examination images and reports as well as a selectable DICOM viewing software.

The DISCUS systems are DICOM Store SCP network units which receive orders from each DICOM workstation or modality with DICOM Store SCU-Class in the network. The EPSON Disc Producer system combined with the DISCUS DMC. Proucer Software processes a large number of jobs at the same time.

The DISCUS software is controlled via web interface which can be used to view order status, error messages and all EPSON status messages. In addition, jobs can be called up via Query/Retrieve.

The complete system consists of an Epson Disc Producer, a high quality and sustainable server hardware and our DISCUS Software. With an additional service contract we guarantee fast support via remote maintenance and a fast exchange of defect components.

Advantages:

- Contact-free, fully automatic system without user intervention
- Software, hardware and support from a single source
- Operation via web interface
- Direct burning from any modality
- Autonomous, PACS-independent system
- Years of experience in the market
- New hardware designed to save space as an Epson base
- Highest security standards
- Faster and easier replacement of defective components
- Rapid replacement of defective hardware
- Web-based software with multi-user access via every computer in the network
- Including new DICOM Media Viewer - now without JAVA!
- Multi DVD orders for large studies
- Epson status reports via web interface
- Automated creation of multi-patient media (e.g. for KV inquiries)
- Automated creation of anonymized media

Give us a Call or visit our new website if you have any further questions.
